

AED Studios

The most ecological
event location

OUR ECOLOGICAL MISSION

Think about tomorrow when choosing an event location. Ecology and economy go hand in hand here. The many permanently furnished halls with modern ecological AV materials allow you to organize your event with the lowest possible CO²-emission, without compromising on creativity. Welcome your guests in a green and oxygen-rich environment.

SOLAR PANELS

AED Studios has 2,000 solar panels that cover the basic consumption of the site.

WASTE SORTING

AED Studios has an extensive waste sorting system. Not only residual waste and paper & cardboard, but also glass, wood, PMD waste, batteries and paint are sorted.

IN-HOUSE

With an internal caterer AED Studios avoids that customers, tenants and staff have to leave the site. A child-care and fitness are also present on site.

RAINWATER HARVESTING

At AED Studios all rainwater is collected, buffered and recovered. The excess water is discharged to nature in a controlled way.

INSULATION & WATER PUMPS

AED studios invested in 24 cm thick insulation and replaced all old heating systems with heat pump systems.

LED ILLUMINATION

99% of the light fittings consist of LED lamps and are controlled by a demotic system.

MOBILITY

According to the mobility study carried out by AED studios, there is efficient mobility thanks to the possibility to reach the site by train, bus or bicycle.

CHARGING STATIONS

AED Studios has 3 charging stations to charge electric cars.

NATURE & FOREST

AED Studios is located in the green southern edge of Antwerp. The planting on the site is intended to promote biodiversity in the surrounding area.

TRANSPORT

AED Studios has a wide range of furniture & AV equipment at its disposal, as well as 4 fully equipped studios so no external transport is required.
